

Free Skin Analysis

How much sun damage does your skin have?

Skin cancer is the most common of all cancers. It accounts for nearly **half of all cancers** in the United States.*

Do you know what's beneath the surface of *your* skin?

* www.cancer.org

**Get your free skin analysis
Saturday, May 4, 2013**

Two times and locations:

- ▶ Mitchell Library from 10:30 am – 12 pm
- ▶ Fair Haven Library from 1 pm – 2:30 pm

The Cornell Scott-Hill Health Center Wellness Education and Outreach Team will be utilizing a skin cancer analyzer courtesy of the American Cancer Society. This tool will look at the approximate sun damage on the skin.

**Free samples of skin care products
will be given out to the first
30 participants at each location!**
